Mr. Matthew Marcou, Director
Public Space, DDOT
1100 Fourth Street S.W., second floor
Washington, D.C. 20024

Re: Washington Gateway, 200 Florida Avenue NE, application 326629, Phase II

Dear Mr. Marcou:

On April 10, 2019, at a regularly scheduled, duly noticed, monthly meeting of ANC 6C, with a quorum of 6 out of 6 commissioners and the public present, the above-mentioned item came before us. The commissioners voted unanimously, 6:0:0, to support this application.

We understand that improvements in the public space of the Washington Gateway mixed use development, Phase II, include sidewalk improvements, standard DDOT streetscape improvements, two window wells, continuation of the existing retaining wall, handrail, door swing, canopy projections and curb replacement as needed for utility trenching. During construction the Metropolitan Branch Trail will be covered with overhead protection; the only disruption to the trail traffic will be when the covering is installed.

Thank you for giving great weight to the recommendations of ANC 6C.

cc: Elliott Garrett
Public Space Committee team

On behalf of ANC 6C,

Karen Wirt
ANC 6C chair
