Re: 629-631 Florida Ave NE, application 327395, proposal to add stoops for entrance access and upgrade utility work

Dear Mr. Marootian:

On October 10, 2019 at a regularly scheduled, duly noticed monthly meeting of ANC 6C, with a quorum of 6 out of 6 commissioners and the public present, the above-mentioned item came before us. The commissioners voted unanimously, 6:0:0, to send you this letter.

The applicant did not respond to requests to appear at the ANC 6C Transportation and Public Space Committee. The commissioners noted:

- The applicant’s traffic control plan does not provide safe accommodations for pedestrians and bicyclists, despite approval from DDOT.
- Construction work in the past few weeks has included pickup and dump trucks on the sidewalk and bike lane/floating bus stop, which puts pedestrians and bicyclists at risk.
- The traffic control plan also fraudulently indicates that sidewalks along Florida Ave NE are 12 feet wide.
- DDOT did not properly deconflict this application with the new improvements along Florida Ave.

ANC 6C thus recommends that this applicant’s existing public space permits be revoked, and that DDOT staff improve its process to review and approve traffic control plans.

Thank you for giving great weight to the recommendations of ANC 6C.

cc: Matthew Marcou

On behalf of ANC 6C,

Karen Wirt
ANC 6C chair
